Coach USA takes first group of 60 MCI J4500 models

The MCI J4500 is Coach USA's first coach to comply with EPA mandates.

Coach USA began the new year with the first 10 of 60 MCI J4500 models featuring clean-diesel. The first nine are equipped with Cummins ISM engines and ZFAstronic transmissions; the other J4500 comes with a Detroit Diesel, ZFAstronic powertrain combination. The remaining 50 J4500 models will be delivered to Coach USA in Spring 2008.

Coach USA's new coaches will be the first in its fleet to feature the new engine technology mandated by the EPA to reduce particulate matter by 90 percent. The 60 coaches will spread across Coach USA's East Coast, Midwest and Coach Canada operations. Coach USA selected comfortable Amaya seating and state-of-the-art entertainment systems for its new coaches along with provisions for Saucon GPS systems.
